

Connor Savugot

730 Floyd Stalcup Rd. • Murphy, NC 28906 • cbsavugo@ncsu.edu • (828) 541-9487

Objective Statement

Looking for an internship for Summer 2024 related to electrical engineering, computer engineering, or programming.

Skills

Programming Languages: Experienced in C, C++, Python, Visual Basic Advanced, Excel (Formulas), MATLAB, AHK, Ti-Basic, and Assembly (LC3). I LOVE programming and am always open to learning new languages!

Problem-Solving: I love Problem Solving. I grew up in a rural area with few resources available to me. This helped me to develop important research skills and perseverance when finding ways to solve my problems.

Passionate: I love all things engineering and learning more about anything that runs on 1's & 0's. Always ready to embrace a new challenge or learn something new!

Personal Projects

Custom Circuit: Created custom voltage pump and boost converter circuits. I don't have a ton of fancy integrated circuits, so I had to also design my own switching circuits for each of these designs. For the boost converter, I learned to use a simple 555 timer to create an astable multivibrator circuit using a potentiometer to make the output frequency adjustable. I used timers and capacitors to increase the input voltage from 5 volts to 9 volts, while decreasing the current. I needed to power a device with a 9 volts barrel jack input. I didn't have the proper power supply, so I decided to design my own instead of buying one. I learned to use a Keysight Programmable Power Supply in the NC State electrical labs to find the desired voltage and current for my device before building these circuits.

Windows 11 Chromebook: Turned my Lenovo Chromebook from high school into a Windows 11 computer. Now I use it to take notes during class because it has a stylus and touchscreen. Taught me a lot about Flashing OS', understanding error messages, and troubleshooting.

Calculator Modding/Programming: Helped me understand that many devices we use daily are just computers. I wrote my own Ti-Basic programs to calculate cross products and dot products. I also figured out how to emulate Gameboy and Gameboy color games.

Assembly Compiler: Built binary/hex/numerical conversion. I worked on parsing an assembly file, removing comments, and converting the assembly instructions into the corresponding 1's and 0's, storing them in a file.

WSL: Created a Linux environment that runs within my Windows OS to make compiling C programs easier. Taught me lots about operating and interacting with command lines and Linux (Ubuntu Distro).

Work Experience

TEAM Industries | Engineering Intern | Andrews, NC **Summer 2021 & 2022**

Developed a Visual Basic Advanced Program within Excel to Identify Out of Spec (Specifications) Parts
Created and maintained many excel spreadsheets, which often required designing my own complex formulas.
Performed monotonous tasks with notable accuracy and efficiency.

Tri-County Community College | Math Tutor | Murphy, NC **January 2022 – May 2022**

Tutored in Precalculus, Statistics, and Quantitative Literacy
Gained experience in tutoring a variety of age groups and patiently explaining complex topics to students.

Mike Adams Plumbing | Plumbing Apprentice | Murphy, NC **Summer 2012 – 2020**

Learned the importance of hard work and gave me an early appreciation for the value of money.
Saw inventive ways to solve problems. Taught me many practical engineering skills and valuable life lessons.

Education

North Carolina State University | Raleigh, NC **May 2026**

Bachelor of Science in Computer Engineering
2nd Year Student, Junior Classification
GPA: 2.7

Tri-County Community College | Murphy, NC **August 2023**

Associates Degree in Arts

Murphy High School | Murphy, NC **May 2022**

High School Diploma
GPA: 4.5

Relevant Coursework

ECE 109 – Intro to Logical Circuits, LC3 Assembly **Spring 2023**

ECE 200 – Intro to Circuit Analysis **Fall 2023**

ECE 211 – Advanced Circuit Analysis **Current**

ECE 212 – Advanced Logical Circuits **Current**

ECE 209 – Intro to C Programming **Fall 2023**

ECE 309 – Object Oriented Programming: C++ **Current**

NCSU Activities

Grace Church | Member | Raleigh, NC **September 2022 – Present**

Participating in outreach and volunteering has allowed me to significantly improve my communication skills.
